AGENDA

J16 Meeting No. 24
WG21 Meeting No. 19
July 14-18, 1997

The major purpose of the previous meeting was to formulate the US position on CD-2 and the US National Body comments to ISO. The major purpose of this meeting is to evaluate all of the ISO NB comments and determine appropriate responses. We may also evaluate other issues members wish to bring forward.

We must bear in mind that NB comments were based on the December draft. Any changes we introduce, whether in response to NB comments or not, carry the risk of changing a National Body vote from YES to NO.

At the next meeting, November 1997, we will vote on a final draft to be submitted for approval as an International Standard. The procedures at that meeting will be similar to the November 1996 meeting in Hawaii: the Project Editor will prepare the final document for voting at the meeting itself. Accordingly, the more work we complete at this meeting, the less hectic the next meeting will be.
